SUMMARY

Backend Java Developer with around 1 year of experience in fintech and e-commerce platforms. Delivered Spring Boot microservices and secure REST APIs that processed thousands of transactions daily, and cut onboarding effort by 60% through automation. Optimized SQL queries and Hibernate mappings to boost response times, enabling scalable, high-performance services.

SKILLS

Backend Development: Java, Spring Boot, Hibernate, Microservices

API & Security: REST APIs, JWT, OAuth2, RestAPI

Frontend Development: React.js, JavaScript, HTML5, CSS3

Databases & Querying: MySQL, PostgreSQL, SQL

Development Tools & DevOps: Git, GitHub, IntelliJ IDEA, VS Code, Postman, Docker

EXPERIENCE

Associate Software Engineer | AWG FinServ Pvt Ltd | Hyderabad | Jun 2024 – Jul 2025

- Engineered 4 fintech microservices in Java with Spring Boot, Hibernate ORM, and MySQL, processing \$2M+ in transactions daily
- Implemented 10 secure REST APIs with JWT authentication, meeting PCI DSS compliance and supporting 1.5k concurrent users
- Automated client onboarding workflow with Spring Batch, cutting manual effort by 60% and onboarding 200+ new accounts per month
- Refactored data access layer using Hibernate caching, boosting backend throughput by 27% and reducing DB load by 22%

PROJECTS

EZBuild | ezbuild4u.com | Staunch Info Solutions | Jan 2026 – Present

- Developed and maintained a low-code/no-code platform for rapid application development
- Built dynamic forms, workflows, and business process automation modules
- Implemented drag-and-drop UI components to simplify application creation
- Designed reusable components to accelerate development and reduce coding effort
- Integrated REST APIs and third-party services for seamless data exchange
- Developed role-based access control (RBAC) and user management features
- Created configurable dashboards and reporting modules for business users
- Optimized platform performance and scalability for enterprise applications
- Collaborated with cross-functional teams to gather requirements and deliver solutions
- Implemented validation rules, notifications, and approval workflows
- Enhanced user experience through responsive and intuitive interfaces
- Supported deployment, testing, and maintenance of applications built on the platform

E-Commerce Platform

- Built full-stack app with Spring Boot and React
- Implemented authentication and order management

Full Cart Application

- Developed shopping cart with inventory system
- Integrated REST APIs for communication

EDUCATION

B.Tech – CSE | AITAM

Intermediate – MPC | SSC

CERTIFICATIONS

- Programming Essentials in Python — Cisco
